"A-Z Product Solutions for Trade and Industry"

All our Continuous Fibreglass Duct Rodders have a copper trace at the core which provides the capability to trace conduit locations when a tracing tool is used. You can use the frame of the rodder as an attachment point for your locator unit, as the duct rod is terminated to the frame, providing Continuity.

All units are supplied with a removable eye and brake as standard and there are other accessories available such as flexible spring leaders, solid leaders, repair kits.

Standard OD	Standard lengths	Suits Conduit size
4mm	60m (max 100)	Up to 50mm
6mm	80m -100m (max 150)	50mm – 80mm
8mm	125m -150m (max 200)	80mm-100mm
11mm	125m –150m-200m (max 300)	100mm – 150mm

The above table shows the most common sizes available, but you can order any length up to the maximum as specified above.

Handy Tip: Make sure that you order a unit with more rod on it than your calculated rodding distance.
EG – rodding over a distance of 50M, order a 60M minimum length rodder.
