

INLINE AERIAL CABLE ROLLER GUIDE

DEFINITION

This in-line aerial cable roller guide is suitable on all cross arm types of intermediate poles. Features 2 x vertical steel bearing rollers and 2 x horizontal steel bearing rollers. This in-line aerial cable roller guide has a SWL of 250kg

EXTERNAL CORNER AERIAL CABLE ROLLER GUIDE

DEFINITION

External Corner Aerial Cable Roller Guide is used on metal cross arms (75mm ID) Full bearing rollers product weight is only 5.4kg

SAGGING AERIAL CABLE ROLLER GUIDE

DEFINITION

Inline Sagging Aerial Cable Roller Guide for 100mm timber cross arms features 4 x offset horizontal bearing rollers and 2 vertical bearing rollers and captive flap. 150mm timber crossarm roller also available. Unit weighs 5.6kg

CROSS ARM AERIAL CABLE ROLLER

DEFINITION

Single 100mm alloy bearing roller for mounting to 100mm crossarm of any type. Supplied with padded "L" mount and ratchet strap assembly making this product a very versatile and easy to use aerial cable roller.

AERIAL STRINGING BLOCK

DEFINITION

The aerial stringing block is ideal when stringing covered conductors. Easy placement and removal of cables.

CAPTIVE STRINGING BLOCK

DEFINITION

Single Cable Blocks are available in three different sizes with 50mm, 80mm and 140mm cast aluminium rollers. The unit comes with a side release bolt which allows the side plate to pivot away from the unit for ease of capturing the cable. The unit has a top eyebolt so shackles or other devices can be attached for hanging purposes.

UNIVERSAL STRINGING BLOCK (7' SHEAVE)

DEFINITION

The most versatile aerial cable roller ever made. Lightweight but extremely rugged. Can be mounted in 5 different working positions on cross arms of any material.

SNATCH BLOCK (450KG)

DEFINITION

- Orange Fibreglass Body.
- Metal Safety Hook.
- Suits Rope to 16mm.
- Rated at 450kg

H.V PIN INSULATOR AERIAL CABLE ROLLER

DEFINITION

Our High Voltage Insulator Roller makes stringing much easier for line crews. No more shoulder strain from lifting the conductor into place. Cable is secure during and after stringing is completed. Simply rotate the Roller 90deg and the cable drops neatly into the insulator groove LR250kg Weight 5.4kg

CROSSARM BRACKET (7A)

DEFINITION

For Universal Stringing Block - Fits up to 5 3/4" & 6 1/4"

STRINGING CONTACT AERIAL CABLE ROLLER

DEFINITION

This Cable Roller is used for stringing Contact Wire by the Railways Authorities, available in Single or Double Roller versions

CANVAS STORAGE BAG

ATM-MV40-BAG

- Storage Bag for fibreglass extension sticks
- Insulated
- Velcro Close

HV STICK W/ UNIVERSAL SUNRISE HEAD

ATM-HVSTICK-2M-SR

- Foam filled Epoxiglass fibreglass operating pole
- Special made approach stick for use with modiewark non-contact voltage tester
- Cut & Fitted with Universal head adaptor
- Fitted with base cap

CROSSARM NAIL PLATE REMOVING DEVICE

ATM-CANPRD

- High tensile jetline attachment rope
- High strength magnet with hook attachment
- Nail plate removal piece attached

LINQ 18MM KARIBINER (25KN)

DESCRIPTION

Widely used in rope-intensive activities such as climbing, tree climbers, caving, sailing, hot air ballooning, rope rescue, construction, industrial rope work, window cleaning, whitewater rescue, and acrobatics

FEATURES

- 18mm Opening Gate
- Material: Steel Alloy
- Type: Screw-Gate with indicator
- 25kN

SCREW SELF DRILLING T17

ATM-EZI603

- Has a special long sharp self drilling point with a flute (Type 17) that cuts the timber fibres as it is screwed in.
- Timber fibres are collected in the flute and reduces the potential for splitting.
- The self drilling type 17 point can also pierce light gauge steel up to 0.6mm without predrilling. The head is a hex flanged.
- Easy to install using a 5/16" socket for 10 and 12 gauge or 3/8" socket for 14 gauge or appropriate driver bit in a power tool.
- 1000 IN PACK

NON-CONDUCTIVE TAPE MEASURE (3M)

ATM-ESZ3NGC

- 19.5mm x 3 metre
- Tested to 20kV
- Non-Conductive

TIGER TAILS

DESCRIPTION

- Tiger Tails are available in 35mm or 45mm ID and are 2.5 metres in length. They are inter lockable and are used to cover and protect overhead power lines and service wires as well as provide high visibility.
- Made in Australia to AS4202

LINE MATS

DESCRIPTION

- Line mats are available in various drop lengths and attachment styles such as magnet pads or peg style. Standard length is 1.2 metres.
- Made in Australia to AS4202

Call Our sales department for technical and data sheets on all overhead line protection products

250MM/10' SHIFTER

ATM-AT210VS

- The original adjustable wrench, made by the world-famous Crescent® brand
- Laser etched scale in both SAE and metric sizes allows easy fastener size identification
- Larger knurl provides a tighter jaw fit, is easier to adjust and is less likely to bind up

HAGLOF PRECISION CALIPERS

ATM-942

- Injected moulded aluminium jaws
- Light weight adjustable jaws
- Large and visible figures for long lasting use
- Non-reflective aluminium beam

POLE CALIPERS (600MM)

ATM-HBPC

- Designed to provide accurate diameter measurements on poles up to 600mm. This is specifically valuable in the maintenance program for timber power poles.

GUY WARNING GUARD TUBE

ATM-GG-P3020S

- PVC Construction
- Spiral Cut for ease of installation
- Visually bright

CROSSARM NAIL PLATE REMOVING DEVICE

ATM-CANPRD

- High tensile jetline attachment rope
- High strength magnet with hook attachment
- Nail plate removal piece attached

INLINE SERVICE TENSIONER

ATM-ILST

The Inline Service Tensioner is predominantly used to provide tension to the overhead service cable at a desired point so termination of hardware can be carried out. Other applications may include the tensioning of short spans of overhead cable, or the lifting or lowering of tool bags or other items when performing pole top work. The standard unit is supplied with 7.5metres of rope which provides a bearing to bearing point of 2.5 metres, however we are able to supply you with any rope length required to suit your application. The unit is constructed from high quality Ronstan pulley and becket blocks and the point of attachment hooks are grade 316 stainless steel. The rope is an 11mm braided nylon response rope with a solid core which has a tensile strength of 3575kg. Each unit is supplied with a NATA test certificate and serial number to a working load limit (WLL) rating up to 250kg. We can also supply the unit in a canvas draw string bag for handy and clean storage.

SENSHIN SK202 8M FIBREGLASS MEASURING POLE

DESCRIPTION

- Perfect for obtaining measurements underneath bridges, overhangs, ceilings, vehicles, trailers, etc. This rugged, fiberglass measuring pole telescopes smoothly and measures up to 8m. Measurements are shown on the sealed, enclosed tape readout which is located on the bottom tier of the pole for easy viewing. Friction clamps ensure no-slip extension of the pole sections. The pole collapses to 1.4m and weighs less than 3kg. Includes shoulder strap and carrying case.

CLAMP BANDIT TOOL

TRI-CT1

- For tensioning and cutting of Steel strapping
- Features crank handle along with inbuilt cutting assembly to enable band style clamps or strapping to be tensioned and cut in during installation

BOLT CUTTER 24'/600MM

TRI-HITNBC0600H

- Recommended for heavy duty use
- Maximum hardness of material to be cut: Brinell 450, Rockwell C48, 162kg/mm² or 110 tonnes/square inch
- Durable jaws are forged from high tensile alloy steel that is specially heat treated and suitable for cutting hard materials

TECHNICIAN SAFETY KNIFE

TRITTK1

- Lock back blade
- Wooden Handle
- Rollover safety

TRIANGULAR TELESCOPIC STICK

ATM-MV40M

- Eye Level reading
- Positive locking buttons, spring loaded
- 40" / 12mtrs extended
- 1.65mtr closed
- 2.7kg

TRIANGULAR FIBREGLASS HEIGHT STICK

ATM-STICK VS-12.00 HM

- Designed to provide the working distance and insulation required to perform routine jobs on overhead electrical systems.
- The unit comprises of a number of sticks that slide into each other with integrated locking buttons.
- The range is supplied with a universal alloy fitting 'universal sunrise' head, which attaches to the numerous universal tools that are available.
- Heavily Glosed fibreglass for smooth extension

8M FIBREGLASS HEIGHT STICK

SOKSK202-8M

- Senshin SK Telescoping Measuring Pole, 1.4m to 8m, graduated in centimeters.
- This rugged, fibreglass measuring pole telescopes smoothly and measures up to 8m. Measurements are shown on the sealed, enclosed tape readout which is located on the bottom tier of the pole for easy viewing.

Original Klein® Grip,
patented in 1892

⚠WARNINGS:

- Grips are to be used for temporary installation, not for permanent anchorage.
- When used on or near energized lines, ground, insulate or isolate grip before pulling.
- Do not exceed rated capacity.
- Always match proper size and type of grip to application.
- Before each use, clean jaw area and inspect grip for proper operation to avoid slippage.

Grip Recommendation

Klein Tools offers a free service of recommending the proper grip for a particular application based on a sample of cable. All that is required is a minimum 6'-9" (2-3 meters) length of cable.

If there is ever a question about the safe condition of any grip, contact Customer Service at **847.821.5500** or **800.553.4676** or email **HiSupport@kleintools.com**.

BARE CONDUCTORS

Haven's™ Grips

“Pork Chop”

Haven's Grips are designed for use when a light, compact grip is desired where conductor deformation is not a factor.

- Gripping pressure of the knurled jaw is applied to 1/4" (6.35 mm) cable area.
- All 1625 series have a swing latch to help hold cable in the jaw.

ACSR TRANSMISSION CABLES

Chicago™ Grips 1628 Series

- Round jaws are shaped to provide maximum contact with the cable, virtually eliminating cable deformation.

In some transmission applications – commonly using the 1628-30, 1628-40 or 1628-50 series Chicago Grips – there is a risk of cable deformation under high tensions. To avoid this risk, Klein Tools recommends using two grips in tandem if the load is expected to exceed the lesser of 12,500 lbs. (5670 kg) or 40% of the ACSR conductor's tensile strength.

1628-40

1628-50

These grips are special order only. Application must be confirmed prior to ordering. Allow 30 days for delivery.

- 1628-50 equipped with removable bolt on floating jaw, secured by a slotted nut and cotter pin. Jaw provides increased cable coverage.

Note: Jaw must be removed to insert cable for model 1628-50.

(11,340 kg)

*Must use two of recommended grips in tandem. See grip use instructions on pages 16-17.

ACSS TRANSMISSION CABLES

Chicago™ Grips 1628 Series

- Round jaws are shaped to provide maximum contact with the cable, virtually eliminating cable deformation.

Best Practices for ACSS Conductors

- 1. Larger than 0.953" outside diameter (approximately 600 MCM)** - Use the 1628-50 or 1628-40 series Chicago Grips. The necessary grip size should be determined based on the cable outside diameter. For applications where the load is expected to exceed 10,000 lbs. (4,536 kg), use two of the appropriate grips in tandem to prevent cable deformation. See instructions for using two grips in tandem on page 17.
- 2. Smaller than 0.953" outside diameter (approximately 600 MCM)** - Use two of the appropriate 1656 series Chicago Grips in tandem. The necessary grip size should be determined based on the cable outside diameter. See instructions for using two grips in tandem on page 17.
- 3. For grip recommendations,** contact us at hisupport@kleintools.com.

* Must use two of recommended grips in tandem. See grip use instructions on pages 16-17.

ACSS/TW TRANSMISSION CABLES

Chicago™ Grips 1628 Series

- Round jaws are shaped to provide maximum contact with the cable, virtually eliminating cable deformation.

Best Practices for ACSS/TW Conductors

- 1. Larger than 0.953" outside diameter (approximately 600 MCM)** - Use the 1628-50 or 1628-40 series Chicago Grips. The necessary grip size should be determined based on the cable outside diameter. For applications where the load is expected to exceed 10,000 lbs. (4,536 kg), use two of the appropriate grips in tandem to prevent cable deformation. See instructions for using two grips in tandem on page 17.
- 2. Smaller than 0.953" outside diameter (approximately 600 MCM)** - Use two of the appropriate 1656 series Chicago Grips in tandem. The necessary grip size should be determined based on the cable outside diameter. See instructions for using two grips in tandem on page 17.
- 3. For grip recommendations, contact us** at hisupport@kleintools.com.

1628-40

1628-50

- 1628-50 equipped with removable bolt on floating jaw, secured by a slotted nut and cotter pin. Jaw provides increased cable coverage.

Note: Jaw must be removed to insert cable for model 1628-50.

Cat. No.	Hot Latch Model No.	Hot Latch/Spring Model No.	Min. to Max. Cable Diameter inches (mm)	Jaw Length	Approx. Weight Each

*These grips are special order only. Application must be confirmed prior to ordering. Allow 30 days for delivery.

Web Strap Ratchet Hoists

- Large, non-conductive drum knob allows web slack to be adjusted with ease.
- 3/4 ton single line and 1-1/2 ton double line load rating.
- Tight ratcheting mechanism allows precise tensioning.
- Meets ANSI/ASME B30.21-2005 & B30.10-2009 standards.
- Hot rings for hot stick use (Cat No. KN1500P-EXH only).

Cat. No.	Pull Type	Weight (lbs.)
KN1500P-EX	Single/ Double	12.5 lbs (5.7 kg)
KN1500P-EXH	Single/ Double	13.6 lbs (6.2 kg)

Single Line

Load Rating: 1500 lbs. (675 kg)
Min. to Max. Pulling Distance: 20" - 138" (500 mm - 3500 mm)

Double Line

Load Rating: 3000 lbs. (1,350 kg)
Min. to Max. Pulling Distance: 26" - 79" (700 mm - 2000 mm)

Hot rings for hot stick use.

KN1500P-EXH

KN1500P-EX

Howe Wire Tool

- Strap is made of tough Klein-Kord™.
- Swivel hook is forged steel with large opening.
- Shank of hook is lengthened to reach under insulator.
- Other end has device to hold the load at any distance.
- All metal parts are galvanized.
- Max. safe load 500 lbs. (225 kg).

Cat. No.	Description	Weight (lbs.)
1702-20N	Nylon Strap 1" (25 mm) wide, 7' (2.1 m) long	1.95 lbs. (0.9 kg)

1702-20N

Grip-Cleaning Brush Set

- Set of four wire-bristle brushes designed for cleaning Klein wire and cable-pulling grips.
- Brushes have stiff wire bristles.
- Available in round and square shapes and two lengths for efficient cleaning of different jaw configurations.
- Semi-flexible steel shafts set into comfortable wooden handles provide the necessary reach into grip jaws.

Cat. No.	Set Contains	Weight (lbs.)
25450		1.00 lbs. (0.45 kg)

Description	Bristle Diameter and Length	Overall Length
round-bristle	3/8" x 3"	12"
square-bristle	(10 mm x 76 mm)	(305 mm)
round-bristle	1-9/16" x 5"	14"
square-bristle	(40 mm x 127 mm)	(356 mm)

25450

Grip Cleaning, Lubricating and Inspecting

The following guidelines have been established to keep all grips in good working condition.

Cleaning

◀ **Step 1.** Use the Klein Grip Cleaning Wire Brush Set (Cat. No. 25450) or emery cloth to clean the surfaces of grip jaws (photo #1).

▶ **Step 2.** Spray de greaser on the grip jaws, all joints and moving parts (photo #2).

◀ **Step 3.** Use the Klein Grip Cleaning Wire Brush to remove dirt and debris from the grip jaws (photo #3).

▶ **Step 4.** Wipe grips dry with soft cloth. Repeat all cleaning steps as necessary until grip is completely clean (photo #4).

Lubricating

◀ **Step 5.** Apply lubricant to all joints and moving parts. Do NOT lubricate gripping surfaces of jaws (photos left #5).

▶ **Step 6.** Carefully inspect jaw condition, proper alignment of jaws and all parts, and possible distortion caused by exceeding safe-load specifications. Grips should operate smoothly. Spring-loaded grips should lock open with loop handle in "Down" position and should close automatically with loop handle "Up." The Klein Parallel Jaw Grip may be tested by opening and closing the jaws by hand, exercising proper caution. All parts and rivets should be checked for distortion (illustration #6).

Never repair any grip. Grips that are bent, misaligned or otherwise distorted should be discarded and replaced.

If there is ever a question about the safe condition of any grip, contact Klein Tools Customer Service directly at **847.821.5500** or **800.553.4676** or email **HiSupport@kleintools.com**.

Dead-Ending

1. Set up the ratchet hoist and Chicago Grip as shown here.
2. Ratchet the hoist until the cable is lined up with the dead-end fixture.
3. After the tension is approximately where it will need to be after termination, ratchet the hoist a couple more times to accommodate for tension loss after hoist removal. Consult cable specifications to ensure the maximum cable tension is not exceeded.

4. When finished, break the tension using the hoist handle, then use either the handle or drum knob to continue releasing the tension.

Sagging Using a Dynamometer

1. Set up ratchet hoist, Chicago Grip and dynamometer as shown here.
2. Ratchet the hoist until the dynamometer displays the desired tension. Consult conductor specifications or company procedures to determine the appropriate tension.
3. When finished, break the tension using the hoist handle, then use either the handle or drum knob to continue releasing the tension.

Splicing

1. Set up ratchet hoist and Chicago Grips as shown here.
2. Connect the KN1500PEX Web Strap Ratchet Hoist to each grip, and ratchet to the desired tension to make the splice.

The cable can now be spliced according to standard work procedures and material guidelines.

3. When finished with the splice, break the tension using the hoist handle, then use either the handle or drum knob to continue releasing the tension.

Using Two Chicago™ Grips in Tandem

For applications where the maximum load exceeds the safe load of an individual grip, or the cable is at risk of deformation, it is recommended to use two Chicago Grips in tandem. Using two grips in tandem divides the weight load between both grips, allowing for an effective work load increase of 1.5 times the safe load of each individual grip.

For example, two Klein Tools 1628-40 Chicago Grips, each with a maximum safe load of 25,000 lbs. (11,340 kg) individually, have a combined working safe load of 37,500 lbs. (17,009 kg).

In some transmission applications—commonly using the 1628-30, 1628-40 or 1628-50 series Chicago Grips—there is a risk of cable deformation under high tensions. To avoid this risk, Klein Tools recommends using two grips in tandem if:

- **ACSR or AAC conductors** – the load is expected to exceed the lesser of 12,500 lbs. (5,670 kg) or 40% of the conductor tensile strength.
- **ACSS conductors**—the load is expected to exceed the lesser of 10,000 lbs. (4,536 kg) or 40% of the conductor tensile strength.

1. Place each grip on the same conductor, approximately five feet apart.
2. Connect a pulley block (leveling block) to the eye of each grip. This will maintain equal distribution of the weight load between both grips.
3. Connect an anchored chain hoist of appropriate capacity to the block as shown in the image above.
4. Ratchet the chain hoist to the desired tension, as shown in the image below.

Materials Used: Klein Tools Chicago Grips, Klein Tools KN1500PEX web strap ratcheting hoist, Dillon Dynamometer, chain hoist, leveling block.

Disclaimer: This is not intended to be a definitive instructional manual for completing the applications. Always consult company procedures and material guidelines before attempting any application.

N.G.K. TOOL GUIDE

NGK TENSION METERS

For precise measurement of tension and loads. Available in various sizes and capacities.

A-1, A-3, A-5, A10 and A-20

Model	Capacity	Graduation	A	B	C	Wt kg
A-1	1kN (0.1t)	20N (2kg)	130	65	20	0.7
A-3	3kN (0.3t)	50N (5kg)	110	65	16	0.7
A-5	5kN (0.5t)	100N (10kg)	110	65	16	0.7
A-10	10kN (1.0t)	200N (20kg)	135	65	16	0.8
A-20	20kN (2.0t)	500N (50kg)	135	65	16	1.2

A-30, A-50

Model	Capacity	Graduation	A	B	C	Wt kg
A-30	30kN (3.0t)	500N (50kg)	150	80	28	2.0
A-50	50kN (5.0t)	1kN (100kg)	260	95	28	3.0

A-100

Model	Capacity	Graduation	A	B	C	Wt kg
A-100	100kN (10.0t)	2kN (200kg)	360	100	38	7.0

N.G.K.

Nagaki Seiki Co Ltd
 Japan manufactures top quality wire rope grips, ratchet pullers, ratchet wrenches and tension meters. These products are manufactured to the highest standards to suit all wire rope tensioning applications.

NGK RATCHET PULLERS

Models N-1000P & N-1500P (1.5m pull)

Handle is insulated and rotates full 360°.

Model	Capacity kN - t	Strap Size mm	Min. Lth mm	Max. Lth mm	Lever Lth mm	Wt kg
N-1000P	10 (1.0)	2 x 33	440	1940	400	3.3
N-1500P	15 (1.5)	2 x 40	470	1970	460	4.6

**Model N-1500P-EX
(1.5m double (D) x 3m single (S) pull)**

Convertible with 3 hooks, handle is insulated and rotates full 360°.

Capacity	Strap Size mm	Min. Lth mm	Max. Lth mm	Lever Lth mm	Wt kg
15kN x 7.5kN	2 x 40	500	D: 2000 S: 3500	460	5

**Model P-1500-EX
(3m double (D) x 6m single (S) pull)**

Steel handle rotates full 360°.

Capacity	Wire Dia. mm	Min. Lth mm	Max. Lth mm	Lever Lth mm	Wt kg
1.5kN x 7.5kN	AIR5	500	D: 3500 S: 6500	430	5

Model Ricky-2 (1.5m pull)

Light weight, alloy link chain, handle rotates full 360°.

Capacity	Chain Dia. mm	Min. Lth mm	Max. Lth mm	Lever Lth mm	Wt kg
7.5kN (0.75t)	5	300	1800	230	4

Model 3000

With 2 pawls, aluminium housing, alloy link chain, steel handle rotates full 360°. Optional chain bag.

Capacity	Chain Dia. mm	Min. Lth mm	Max. Lth mm	Lever Lth mm	Wt kg
30kN (3.0t)	5	480	2000	430	8

Model 4000 & 6000

Alloy link chain, handle rotates full 360°. Optional chain bag.

Capacity	Chain Dia. mm	Min. Lth mm	Max. Lth mm	Lever Lth mm	Wt kg
40kN (4.0t)	5	580	2180	430	12
60kN (6.0t)	5	650	2250	430	19

Model Ricky-3 (1.5m pull)

Light weight, alloy link chain, handle rotates full 360°.

Capacity	Chain Dia. mm	Min. Lth mm	Max. Lth mm	Lever Lth mm	Wt kg
15kN (1.5t)	5	350	1850	230	5

NGK RATCHET WRENCH

Model BY-3

Four different sizes in one (insulated handle).

Model BY-3	D mm	10	12	16	20	Wt. kg
	B mm	17	19	24	30	0.9

NGK WIRE GRIPS

1 tonne L-Grip

Uses: For bare copper cable, covered conductor and messenger wire.

With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
10kN (1.0t)	4	22	1.1

2 tonne L-Grip

Uses: For bare copper cable, covered conductor and messenger wire.

With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
20kN (2.0t)	4	22	1.3

3 tonne Grip

Uses: For wire rope, messenger wire, copper cable and trolley cable. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
30kN (3.0t)	8	22	3.0

4 tonne Grip

Uses: For wire rope, messenger wire, copper cable and trolley cable. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
40kN (4.0t)	13	28	5.0

6 tonne Grip

Uses: Wire rope, copper cable and trolley cable. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
60kN (6.0t)	13	28	5.2

10 tonne Grip

Uses: Wire rope and messenger wire. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
100kN (10.0t)	18	32	10

WARNING: THESE PRODUCTS CANNOT BE USED FOR LIFTING AND LOWERING OR FOR SUPPORTING HUMAN CARGO!

NGK WIRE GRIPS

SD L-Grip

Uses: For steel rod, copper cable and messenger wire. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
10kN (1.0t)	2.6	15	0.6

Middle L-Grip

Uses: For copper cable, covered conductor and messenger wire. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
20kN (2.0t)	5	25	1.8

Messen L-Grip

Uses: For copper cable and messenger wire. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
10kN (1.0t)	4	12	0.7

Large L-Grip

Uses: For copper cable and covered conductor. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
20kN (2.0t)	16	32	2.1

2 tonne W-Grip

Uses: For wire rope, messenger wire, copper cable and trolley cable. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
20kN (2.0t)	5	16	1.4

ABC Grip

Uses: For aerial bundled cable. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
8.5kN (0.85t)	4 x 35	4 x 95	3.0

WARNING: THESE PRODUCTS CANNOT BE USED FOR LIFTING AND LOWERING OR FOR SUPPORTING HUMAN CARGO!

NGK WIRE GRIPS

AL L-Grip

Fine, smooth jaws to minimise conductor damage. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
10kN (1.0t)	5	22	1.1

AL - Large Grip

Uses: For bare aluminium cable. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
20kN (2.0t)	16	32	2.0

2 tonne AL-Grip

Uses: Bare aluminium cable. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
20kN (2.0t)	5	16	1.5

3 tonne AL-Grip

Fine, smooth jaws to minimise conductor damage. With safety latch

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
30kN (3.0t)	8	22	3

AL - Middle Grip

Uses: For bare aluminium cable. With safety latch. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
20kN (2.0t)	5	25	1.8

4 tonne AL-Grip

Uses: Bare aluminium cable. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
40kN (4.0t)	20	35	3.7

WARNING: THESE PRODUCTS CANNOT BE USED FOR LIFTING AND LOWERING OR FOR SUPPORTING HUMAN CARGO!

NGK WIRE GRIPS

10 tonne AL-Grip

Uses: Large size bare aluminium cable only. With safety latch.

Safe Working Load	Cable Range	Jaw Length	Weight kg
100kN (10.0t)	Ø 32-46	300	13
	Ø 42-52 (Option)		

Trolley Grip Type 1 & 2

Uses: For railway work, trolley cable, messenger wire, wire rope and copper cable. With safety latch.

Safe Working Load	Min. Cable Dia. mm	Max. Cable Dia. mm	Weight kg
20kN (2.0t)	5-16	100	1.5
20kN (2.0t)	8-20	150	2.8

NAGAKI TOOLS TRIPLE S: SAFETY, SPEEDY AND STRONG

All Nagaki tools have cleared our “SSS” (Safety, Speedy and Strong) quality standard. With half a century of experience and knowledge in making tools for electrical facilities works behind us, Nagaki meets the user’s up to date needs with cutting-edge technology and superior manufacturing skills.

Nagaki has obtained the certifications of International Standards:

ISO9001 and ISO14001

(Wire grip tools – Hot stick tools)

With its constant effort to improve quality and reduce the burden on the environment, Nagaki has obtained ISO9001 and ISO14001 certifications, the top international standards for quality and environmental sustainability. We are determined to continue our efforts in doing all we can to serve our customers needs and earn their trust.

SAFETY

ENSURING SAFETY

Nagaki tools ensure safety of operation and help to prevent worksite accidents

SSS TRIPLE “S”

SPEEDY

IMPROVING EFFICIENCY

Nagaki tools perform with precision and efficiency in all sorts of environments

STRONG

ACHIEVING DURABILITY

Nagaki tools can endure harsh working conditions and will maintain premium quality over long periods of use

A.B.C. COMEALONGS

Aerial Bundled Conductor (ABC) Comelongs are designed to reduce cable fatigue and provide ease of application for the user. Equipped with plated bodies, a long fixed lower jaw and spring loaded upper jaw the unit is fitted to the conductor which will retain it firmly in place so attachment to ratchet pullers or our in-line service tension pullers can be carried out with ease, compliments of the large hauling eye provided. This product was specifically designed for service line work following numerous requests from the power industry to supply a comealong suitable for all service lines.

Code	Application	Cable OD	2 Core	4 Core	Eye size mm	WLL	Weight
12870	Service Lines (small ABC)	8-25mm	2 x 16 , 2 x 50	4 x 16. 4 x 35	27 x 40	2.0 kN	0.9kg
12887	Large ABC	14-34mm	2 x 25, 2 x 95	4 x 25, 4 x 95	30 x 45	10.0kN	2.1kg

9401-SP

WIRE ROPE TENSIONING CLAMP

- Designed for copper and steel wires
- Suitable for linesmen, bridge builders, industry and agriculture
- Parallel hardened steel tensioning jaws
- Galvanised body
- Spring-loaded jaws grip wire easily

Jaw profile

cat.-no.	wire Ø (mm)	working load limit (kg)	eye size (mm)
9401-05-SP	1 - 5	500	20 x 20
9401-09-SP	3 - 9	1000	22 x 22
9401-12-SP	4 - 12	1700	27 x 27
9401-18-SP	6 - 18	3000	25 x 38
9401-28-SP	10 - 28	3500	30 x 40
9401-40-SP	20 - 40	4000	30 x 40

9401-ALU

ALUMINIUM ROPE TENSIONING CLAMP

- Designed for aluminium and A.C.S.R. wires
- Suitable for linesmen
- Parallel galvanised tensioning jaws
- Galvanised body
- Spring-loaded jaws grip wire easily

Jaw profile

cat.-no.	wire Ø (mm)	working load limit (kg)	eye size (mm)
9401-08-ALU	5.4 - 8.5	1000	22 x 22
9401-12-ALU	5 - 12	1700	27 x 27
9401-16-ALU	8 - 18	3000	25 x 38
9401-20-ALU	15 - 28	3500	30 x 40
9401-30-ALU	20 - 40	4000	30 x 40

2800

TIE-WIRE TWISTER

- Industrial quality twister
- Machined spring-return spiral spindle
- Designed for fast, secure tying of sack closures, tie wires etc.

cat.-no.	length (mm)
2800	320

2801

WIRE TWISTER

- Hardened steel revolving hook
- Lacquered wooden handle

cat.-no.	length (mm)
2801	200

3157 / 3158

STENCIL PLATE

- Sets of non-interlocking zinc stencils
- Available in letter sets and figure sets

Letter stencil plate 3157

Figure stencil plate 3158

Letter - Stencil Plate cat.-no. 3157
27 piece: A - Z (Capitals and "&")

Figure - Stencil Plate cat.-no. 3158
